PROFESSIONAL SUMMARY

.NET Desktop Developer and Industrial Engineering graduate with experience in software development, biometric attendance systems, manufacturing operations, and operational support. Experienced in developing and maintaining internal company applications using VB.NET, C#, VB6, PHP, and Microsoft SQL Server. Skilled in troubleshooting, system optimization, database management, attendance system administration, and production supervision.

EDUCATION

Universitas Muhammadiyah Riau – Riau, Indonesia
Bachelor Degree in Industrial Engineering
Graduated: 2023 | GPA: 3.33/4.00

PROFESSIONAL EXPERIENCE

Attendance System Administrator
Pulau Burung, Riau, Indonesia | Aug 2025 – Present

- Performed configuration, maintenance, and adjustment of biometric attendance devices including fingerprint and palm recognition systems.
- Managed user enrollment and attendance synchronization processes using Solution attendance software.
- Conducted system maintenance and monitoring to ensure smooth attendance operations.
- Coordinated with operational teams to resolve technical issues related to attendance systems.

.NET Developer / Software Developer
Pulau Burung, Riau, Indonesia | May 2024 – Present

- Handle and maintain an online training application based on VB.NET designed to improve and enhance employees' fundamental knowledge and skills within the company.
- Develop, maintain, and manage a VB.NET desktop application used to process weighing transactions for coconut and pineapple raw material deliveries from suppliers and farmers, covering net weight calculation, reject sorting, and sample-based quality grading, with transaction data stored in Microsoft SQL Server.
- Develop and maintain a VB6-based purchasing application that consumes weighing transaction data to determine raw material purchase prices based on the latest period-based pricing, then forwards validated purchasing records downstream to the Accounting and Finance systems for payment processing.
- Develop, maintain, and improve internal company applications based on desktop and web technologies using VB.NET, C#, VB6, PHP, and Microsoft SQL Server.
- Perform troubleshooting, debugging, and system optimization to ensure application stability and operational efficiency, including tracing cross-application data inconsistencies, fixing calculation and UI logic bugs, and validating digital transaction records against physical source documents to ensure data integrity across the weighing-to-purchasing pipeline.
- Manage and maintain attendance systems, including biometric fingerprint and palm recognition devices using Solution attendance software.
- Support database management, reporting, and integration processes related to internal operational systems.
- Collaborate with operational teams to analyze user requirements and implement system improvements.
- Optimize existing systems to improve workflow efficiency and reduce operational issues.

Can Making Line Deputy Head of Shift
Pulau Burung, Riau, Indonesia | Nov 2023 – May 2024

- Ensured smooth production operations for coconut milk and canned pineapple packaging lines.
- Monitored the availability and adequacy of raw materials for can manufacturing production processes.
- Managed production workforce allocation and prepared employee work schedules in accordance with operational and national standards.
- Coordinated and ensured preventive maintenance schedules for production machines were implemented according to Total Productive Maintenance (TPM) standards.
- Supervised daily production activities to maintain operational efficiency, product quality, and production target achievement.

Ground Handling Staff – PT Gapura Angkasa (Scoot Pte Ltd)
Denpasar, Bali, Indonesia | 2017 – 2019

- Assisted passengers during check-in and baggage handling for international flights to Singapore.
- Validated passenger travel documents, visas, and return tickets according to immigration regulations.
- Ensured pre-flight operational preparation was completed accurately and efficiently.
- Coordinated with central operational staff to resolve post-flight and passenger service issues.
- Maintained excellent customer service and communication during airport operations.

CERTIFICATIONS

Professional Certification – Supply Chain Management
Indonesian Professional Certification Authority (BNSP) | Issued: March 2024

- Certified competent in Supply Chain Management with specialization in Delivery Management.
- Certification issued by LSP Teknik Manajemen Industri under the Indonesian Professional Certification Authority (BNSP).
- Competency areas include delivery management, transportation provider evaluation, and material transport preparation.

ORGANIZATIONAL EXPERIENCE

Head of Equipment Division – Basic Organizational Training | 2021

- Managed logistics, camping equipment, transportation, and operational necessities during organizational training activities.
- Coordinated division members to ensure equipment safety and readiness.
- Prepared expenditure reports and logistics documentation after event completion.

TECHNICAL SKILLS

- Programming Languages: VB.NET, C#, VB6, PHP
- Database: Microsoft SQL Server, PostgreSQL
- System Administration: Biometric Attendance Systems, Troubleshooting, System Maintenance
- Manufacturing: Production Operations, TPM, Workforce Scheduling
- Other Skills: Microsoft Office, Problem Solving, Critical Thinking, Communication, Adaptability
